REPORT OF HEALTH OFFICER

I herewith submit my report as Health Officer for the year ending January 31, 1937.

I have had reported to me the following conta-

gious diseases: one tuberculosis; two chicken pox; three measles; and three scarlet fever.

At the time of the flood, in conjunction with the State Board of Health, it was suggested that all water be boiled, and household chlorination be carried out.

I sent to the State Laboratory of Hygiene for analysis twelve samples of milk taken from dealers with the report all satisfactory except one, which had excessive amount of sediment. Ten lots of town water were also sent. Iron in excessive quantity was the only criticism.

Several complaints were made about the Town Dump, and with the advice and assistance of the selectmen, it was kept in very good condition. The land has now been sold, and the selectmen have purchased a new lot about a mile outside the village, which will eliminate a lot of trouble and complaints.

I again appeal to the citizens of our town to co-operate with me in the discharge of my duties as Health Officer, and in so doing, much good can be accomplished and the health laws more easily enforced.

Respectfully,
GEORGE A. GILMORE,
Health Officer.
